

CareConnect

A Three-Tier Childcare Marketplace — Flutter + Supabase + IEEE 830 SRS

Three integrated Flutter apps (Mother + Babysitter + Admin Panel) on a unified Supabase backend, connecting parents with verified babysitters under transparent admin moderation.

The Problem. Childcare in Arabic-speaking regions is dominated by informal networks — Facebook groups, word-of-mouth — with no trust verification, no reputation portability for providers, and no quality oversight. Working mothers reduce hours or exit the workforce; skilled babysitters earn unpredictable income; children miss structured enriching care.

The Solution. Three Flutter apps on a unified Supabase backend: a Mother App for discovery and booking, a Babysitter App (co-developed with @shaha123s) for providers, and an Admin Panel for platform operators. Realtime sync, Google Maps discovery, WhatsApp communication, RBAC at the database layer.

Three Apps, One Ecosystem

App	Audience	Key Features
Mother App	Parents	Discovery, booking, task list, vaccines, sleep/meal tracking
Babysitter App	Providers	Booking inbox, certifications, task execution, ratings
Admin Panel	Operators	User management, payment audit, moderation, library curation

SDG Alignment

- SDG 5 — Gender Equality (5.4, 5.b)
- SDG 8 — Decent Work (8.3, 8.5)
- SDG 4 — Early Childhood Dev (4.2)
- SDG 10 — Reduced Inequalities (10.2)

Market

- **TAM:** ~\$600M (40M MENA households)
- **SAM:** \$50M (Levant + Gulf + Egypt)
- **SOM (3 yr):** \$1.5M–\$3.5M
- **Model:** Subscriptions + per-booking commission

Team

- **Mozn Jamous** — Mother App, Admin, backend, SRS
- **Shahab** (@shaha123s) — Babysitter App co-dev
- **Hiring (post-pilot):** mobile eng, growth lead

Technology Stack

Layer	Choice	Why
Mobile (3 apps)	Flutter + Provider	Cross-platform, single language, mature RTL
Backend	Supabase + PostgreSQL	Realtime, RLS, free tier, relational integrity
Auth	Supabase Auth + OAuth	Email + Google + Facebook
Access Control	RBAC enforced via RLS	Database-layer single source of truth
Maps	Google Maps Platform	Strong MENA city coverage
Communication	WhatsApp Business API	Matches user habits
Security	JWT + bcrypt + AES-256	Industry-standard
Documentation	IEEE 830 SRS	Full requirements engineering

We are actively seeking:

Women's economic empowerment grants (UN Women, World Bank, Cherie Blair Foundation) · MENA accelerator partnerships (Misk, MBRF, Flat6Labs, Antler MENA) · Early-childhood development funders (ELMA Foundation, Grand Challenges Canada) · Clinic and nursery partnerships in Damascus and Gulf cities for pilot deployment.

Childcare is the invisible infrastructure that enables every other form of work. CareConnect is our contribution to making that infrastructure visible, accountable, and economically empowering for everyone involved.
